

# LEARNING HOUR

## Online Tutoring Service

Learning Hour from ThreeBrix e-services, a subsidiary of Educomp Solutions Limited, is one of the most popular online tutoring portals in the country. It is also regularly used by thousands of school students in the Middle East. Learning Hour is an online, educational-assistance portal, offering a complete suite of assistance services to students across the world. The main services offered are academic assistance to school students, Test Preparation and Application assistance.

## About Learning Hour

- Learning Hour was conceptualized and launched by alumnus of IIT-Delhi and IIM-Ahmedabad
- First tutoring website in India to have full audio-video conferencing along with standard tutoring whiteboard functionality
- First website to launch services for CBSE and GCSE curriculums across 5 subjects for students in Gulf region and receive tremendous response
- Offering one-to-one online tutoring for school students for normal academic tutoring and 1:4 tutoring for test prep modules like IIT-JEE, PMT etc
- All tutors are post-graduates, engineers and doctorates in relevant subjects and undergo rigorous training in online tutoring processes and Learning Hour pedagogy

## A Snapshot of the Tutoring Process

- Students register on the website and create their customized study schedule under the advice of a tutor and the customer relationship managers
- On the time of the session, they log into the website and click a button to enter the assigned virtual classroom, which has a tutor waiting for them.
- Students and tutors interact through voice, video and a whiteboard which replicates the physical tutoring process almost 100%
- The whiteboard is used in conjunction with a digital pen, which is a cordless pen used by the students/tutors to write on a pad, and their writing is instantly replicated on the whiteboard screen
- Tutors also use a number of presentations, illustrations, animations etc to better explain concepts to the students. They also take periodic tests for assessment and progress tracking
- The entire tutoring session is recorded on the tutor and students computers. The student can replay the whole session anytime for revision

The entire tutoring session is recorded on the tutor and students computers. The student can replay the whole session anytime for revision
