

LEARNING HOUR

Tutoring Service

Educomp learning hour is a tutoring company innovating new products in supplemental education. The main services offered are academic assistance to school students and Test Preparation programs.

Learning Hour, a subsidiary of Educomp Solutions Limited, runs online tutoring services, tutoring centers and VSAT based test prep programs. It is one of the largest Online Tutoring services provider for India and launched the first of its kind "Concept Tutoring" Centers for school students. It is also the pioneer in launching VSAT based test prep programs in the country.

Learning Hour is one of the most popular online tutoring portals in the country and is regularly used by thousands of school students in the Middle East.

LearningHour.com

First tutoring website in India to have full audio-video conferencing along with standard tutoring whiteboard functionality. Learning Hour offers 1-to-1 online tutoring in all curriculums from Grade 6-12 primarily in India and Middle East using an online tutoring platform on which students and tutors communicate with each other using voice, video and digital whiteboards.

- First website to launch services for CBSE and GCSE curriculums across 5 subjects for students in Gulf region and receive tremendous response
- Offering one-to-one online tutoring for school students for normal standard academic tutoring and 1:4 tutoring for test prep modules like IIT-JEE, PMT etc
- All tutors are post-graduates, engineers and, doctorates in relevant subjects and undergo rigorous training in online tutoring processes and Learning Hour pedagogy
- Uses WiZiQ Technology

A Snapshot of the Tutoring Process

- Students register on the website and create their customized study schedule under the advice of a tutor and the customer relationship managers
- On the time of the session, they log into the website and click a button to enter the assigned virtual classroom, which has a tutor waiting for them.
- Students and tutors interact through voice, video and a whiteboard which replicates the physical tutoring process almost 100%
- The whiteboard is used in conjunction with a digital pen, which is a cordless pen used by the students/tutors to write on a pad, and their writing is instantly replicated on the whiteboard screen
- Tutors also use a number of presentations, illustrations, animations etc to better explain concepts to the students. They also take periodic tests for assessment and progress tracking
- The entire tutoring session is recorded on the tutor and students computers. The student can replay the whole session anytime for revision

LearningHour Tutoring Centers
