

Mathguru™

Mathguru™, the innovative Math-help program, 100% in Math

Hundreds of thousands of school students in the country resort to post-school tuitions, especially for Mathematics. In a class full of a diverse set of learners at school, many students are unable to cope up with the pace with which the teacher explains key steps involved in solving Math problems given in their text books. Constraints to finish the entire Math curriculum within the academic year in class leaves the teacher with very little time to help students solve each and every math problem given in the text book. At home, parents, with their limited time and ability to assist the student, have no option but to engage a Math tutor for the child. Mathguru™ is an innovative math-help program to resolve this learning-inconsistency for the student. Mathguru™ helps students learn how to solve every single math problem as per their curriculum, text books or syllabus – anytime anywhere – as a real personal tutor.

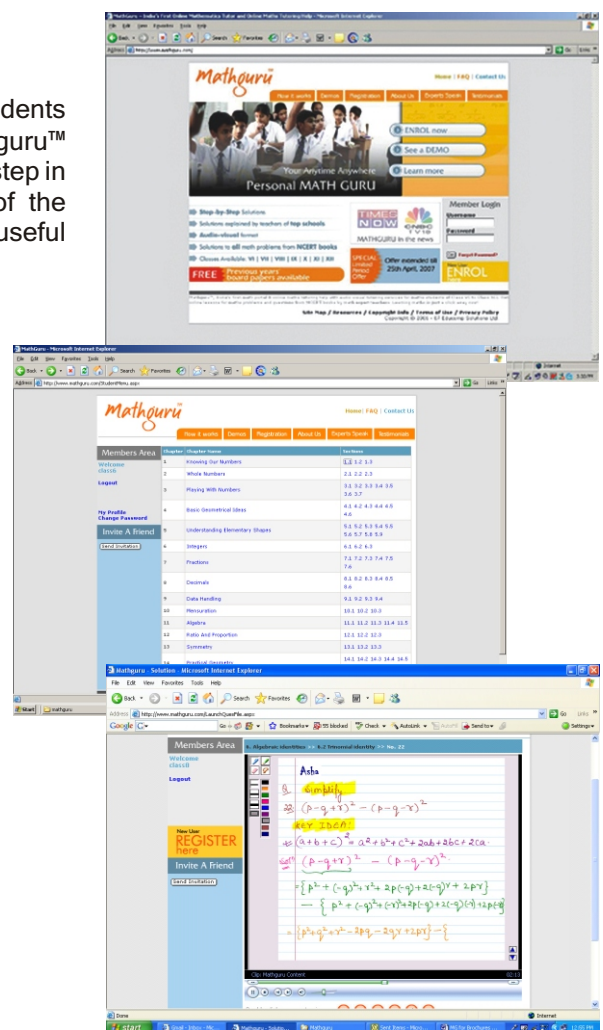

Overview

Mathguru™ is a unique math-help program for school students studying in classes VI through XII. Math experts behind Mathguru™ use a virtual notebook and pen to explain the solution step by step in their own voice. Mathguru™ takes students to the heart of the problem by illustrating the solution in the most common and useful method.

The repository of solutions at Mathguru™ contains all problems from the NCERT Math books. The easy-to-use website keeps all problems and solutions arranged in a structured topic format, thus benefiting students across other curricula/state education boards also. Very soon, problems pertaining to other curricula will also be incorporated.

Advantage Mathguru™

- Find the solution when stuck with a problem
- Complete math homework
- Have experts solve math problems anytime, anywhere
- Never get left behind in math class
- Enhance knowledge level
- Improves understanding
- Strengthen fundamentals
- Easy to follow methods to clarify doubts
